

Island Mining SEZC

BRINGING MINING INTO THE
MAINSTREAM

Revised Oct 22, 2019

Corporate Summary

ISLAND MINING SEZC (Cayman)

- Island Mining is an integrated cloud mining facility, ASIC miner developer, and international crypto-fiat exchange.
- Our integrated service allows any consumer to passively mine and spend cryptocurrency with zero friction, while our ASIC miner development wing is creating the next generation of mining equipment for both home and industrial use.

Our Team

STRENGTH & SKILLS

- Our team has the experience and international connections necessary to achieve our goals.
- Led by Bitcoin pioneer Christopher Filiatrault - responsible for the first Bitcoin ATMs in Japan and previously raised over \$30 million for similar projects
- Director Chris Marsh is a key member of **Syscoin (SYS) team, which is currently listed on Binance** as well as highly experienced Japanese and Canadian engineers and financial leaders.

Mining Coin Utility Token

ERC-1404 Token Standard

- **The Mining Coin (MNT) token is structured for regulatory compliance**
 - We are ensuring future regulatory compliance by utilizing the ERC-1404 standard in conjunction with the same strict KYC procedure used by major exchanges and financial institutions
- **Token Details**
 - Smart Contract Address
0x49073cccc5309a814da07b47ca604fcd06590702
 - Total Supply
1,000,000,000 MNT

Mining Coin Utility Token

ERC-1404 Token Standard

- **Token Functionality**

- MNT token holders are perpetually entitled to a percentage of hashing power produced by Island Mining facilities, proportional to the balance of MNT tokens in their account. Users can designate their hashing power for any task (not only mining BTC).

- **Current MNT Power**

- Based on our current hardware configuration, approx. 1,700 MNT \approx 1 Th/s, approximately yielding 0.0072 BTC/year based on current Bitcoin network difficulty, if users' hashing power is assigned to Bitcoin mining.
